

Announcing new A+ Certification Course offered at ELTC!

This new and exciting training begins in January. Our A+ Certification training class will teach the skills needed to pass the two exams to become certified as a PC technician. The CompTIA A+ certification validates the skills needed by computer support professionals. It is an international, vendor-neutral certification recognized by major hardware and software vendors, distributors and resellers. CompTIA A+ confirms a technician's ability to perform tasks such as installation, configuration, diagnosing, preventative maintenance and basic networking. CompTIA is the agency that prepares and scores the four types of A+ certification exams. Students must take two of these exams to become certified as a PC technician. ELTC's program will train students to pass the two core exams.

Currently the closest place to take the exams is Loveland. ELTC is working with CompTIA to become a test center so students and others can take those exams here. The cost of the two tests is \$168, which is **not** included in the cost of the class.

The class is 18 weeks long (108 hours) and will meet Tuesday and Thursday evenings from 6-9 pm. This hands-on class covers installation, troubleshooting & repairs, maintenance, peripherals, software, connectivity, safety/environment, and computer security. Students should have basic knowledge of the PC and MS Windows and Word. The class includes a two-hour review as preparation to take the exams.

Full price is \$1,834 **including** the required books and tool kit. This class is eligible for ELTC's sliding-fee scale discount. Class registration will be January 5th-14th although **we will accept early registration**. Classes begin January 20th. Students will need to bring a valid photo id and those pursuing a sliding fee scale discount, should bring documents proving their last three months of income for all individuals in the household over the age of 18.

If you have questions, please contact me. We are excited about this opportunity and feel this certification is the gateway to a lucrative career as a PC Technician. Enrollment is limited to just 8 students so sign up now!
